

PROJECT ROLES AND RESPONSIBILITIES

Project Name

HomeGigs

Name

Role

Responsibilities

Chiemego
Emmanuel Nwokolo

Project manager, scrum
master, & full stack
developer (backend)

- Defines the MVP features for each sprint.
- Organizes meetings and tracks progress.
- Manages the project's milestones.
- Manages database design and data persistence.
- Designs and implements the server using Node.js and Express.

Ali Abdullah

Assistant manager, full
stack developer (frontend
and backend) & designer

- Assists and advises scrum master in managing meetings, tracking progress, and improving designs and/or functioning.
- Connects frontend forms to backend APIs.
- Builds designs and prototypes for majority of the functionality found in the application.
- Ensures frontend meets functional requirements and displays look attractive.

Nyabijek Gatdet

Project designer and
developer (frontend and
backend)

- Designs and contributes to user interface and keeps it interactive.
- Implements low and high fidelity prototypes using Figma.
- Assists in backend feature development.
- Ensures consistency between design and implementation.

Chinedu Godswill
Nwoye

Project tester and
developer (frontend and
backend)

- Identifies and reports bugs.
- Tests users during sprints with a usability questionnaire.
- Verifies that functional requirements are met, and implementations are consistent.
- Conducts integration testing between frontend and backend.
