

ENSE 281 – GROUP E PROJECT (HOMEGIGS) UML DIAGRAMS

Diagram 01 – Class Diagram:

- ❖ The class diagram visualizes the object-oriented structure of the project. It indicates different classes like admin, client, and worker, all under one category as users, and in a tree structure with multiple branches.

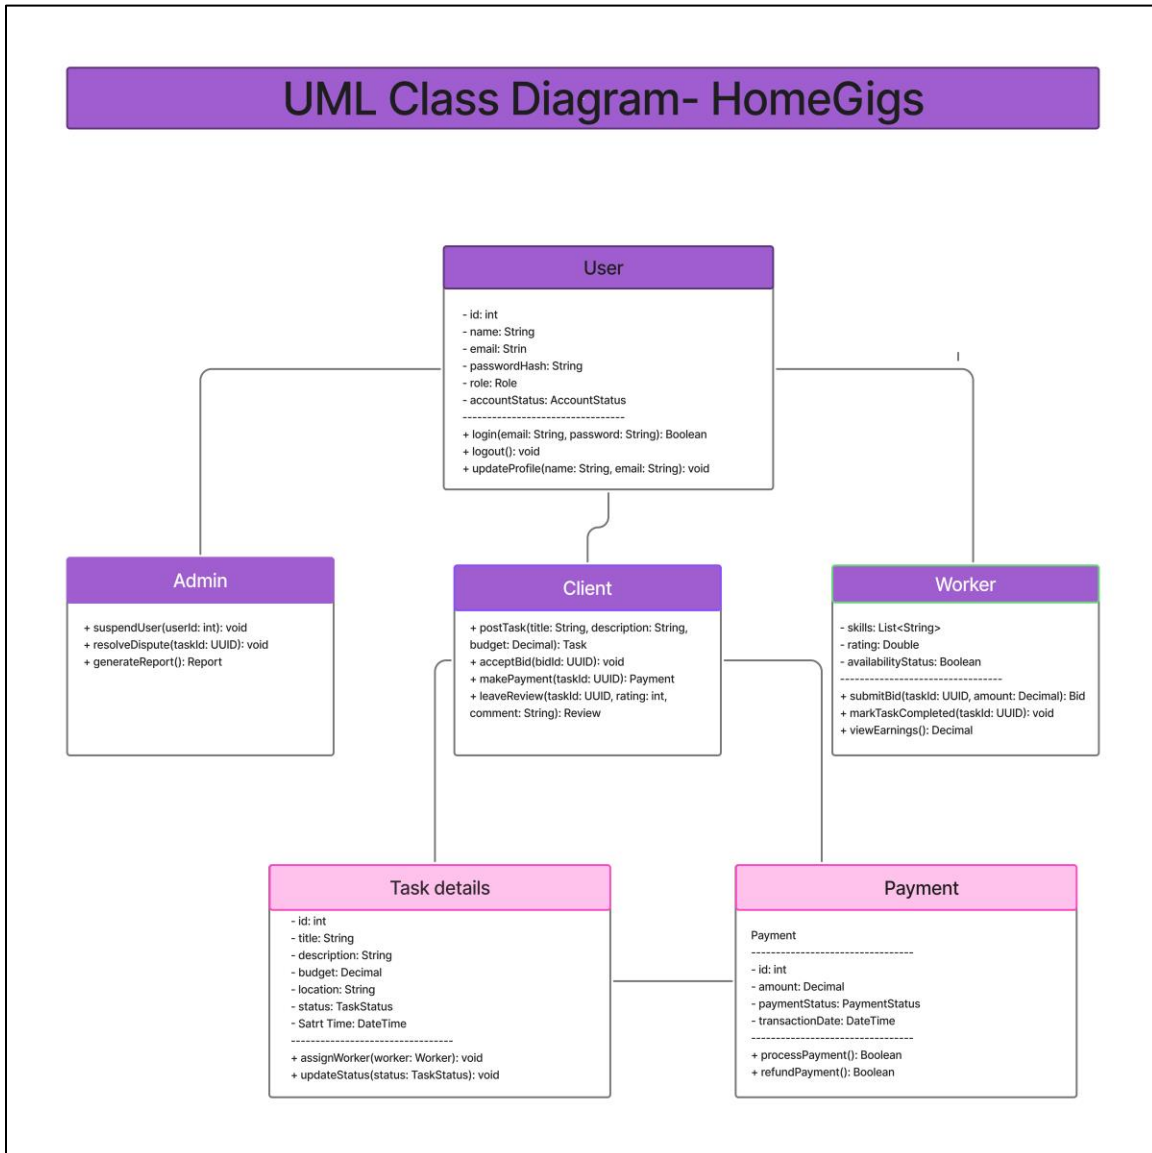

Diagram 02 – Sequence Diagram:

- ❖ The sequence diagram visualizes step-by-step interaction between objects or components in the system. It indicates functions that take place from one class to another class and how it all goes back and forth.

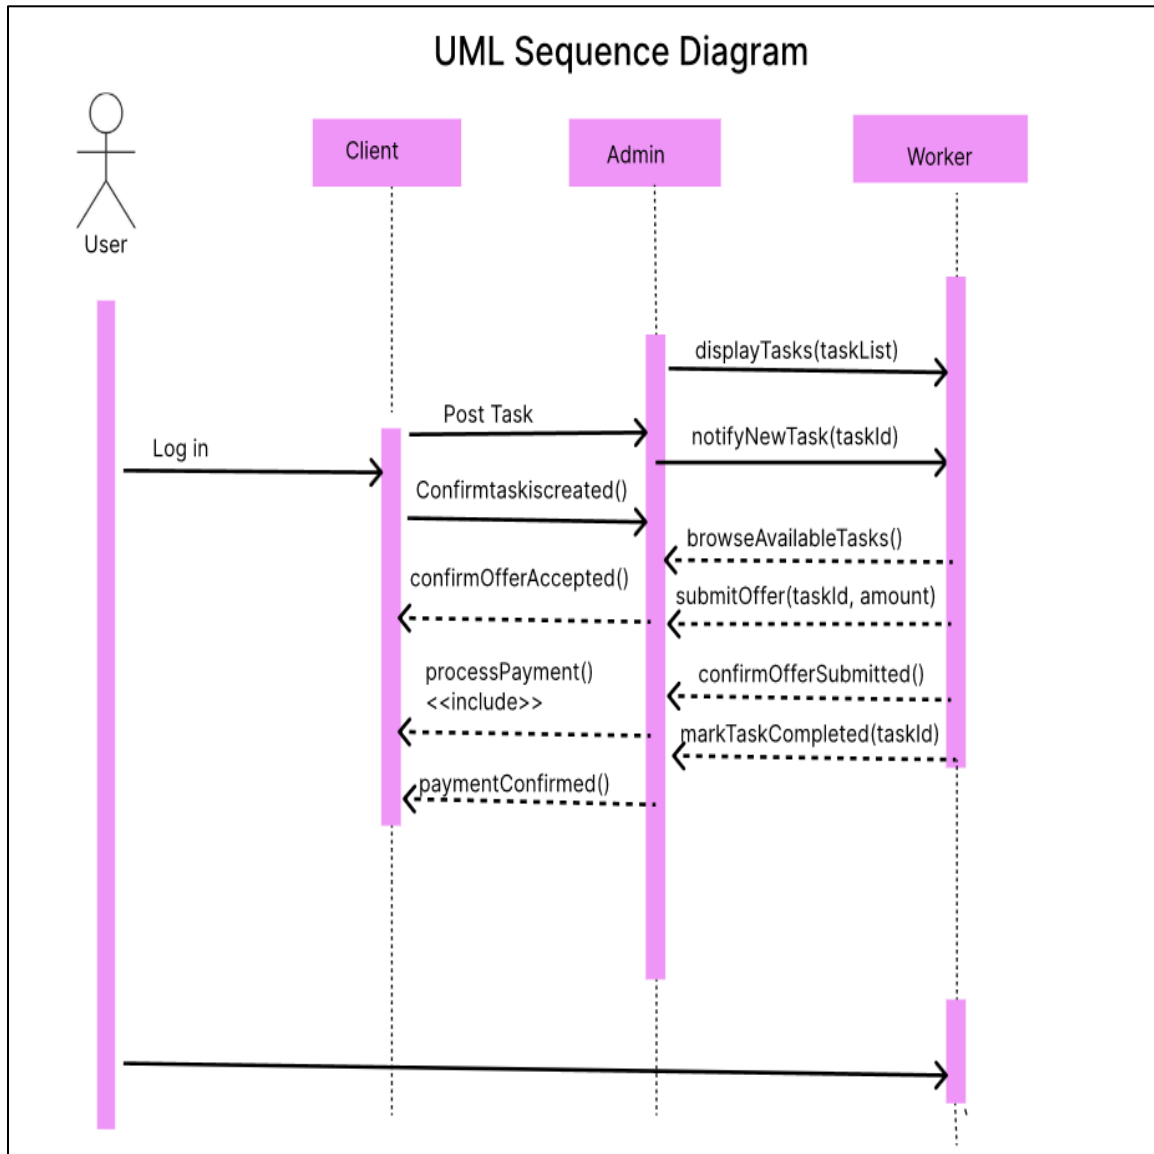

Diagram 03 – Use Case Diagram:

- ❖ The use case diagram visualizes system requirements from an end-user perspective. It indicates external systems and users of the project to streamline their goals and communication by a simple graphical overview.
